***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest a method for determining a substrate type comprising determining said substrate type by comparing said optical signal with a threshold value, said threshold value comprises setting said threshold value to an average of an intensity ratio corresponding to an incorrect substrate type and an intensity ratio corresponding to a correct substrate type, as in the context of claim 1.

The closest prior art, Kim et al, discloses a method for determining substrate type which comprises detecting optical signals and performing a mathematical operation on those signals, and then comparing to a predetermined threshold value. However, Kim does not teach or suggest how the predetermined threshold value is calculated, and thus does not teach or suggest determining the threshold value by setting it to an average of an intensity ratio corresponding to an incorrect substrate type and an intensity value corresponding to a correct substrate type, as in the context of claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anita K. Alanko whose telephone number is 571-272-1458. The examiner can normally be reached on Mon-Fri until 2:30 pm (Wed until 11:30).
